

How to measure your braai for an insert quotation

	A = WIDTH	B = DEPTH	C = HEIGHT	D = LINTOL WIDTH	E = CHIMNEY
minimum					
maximum					
Please measure at least at 3 positions each, and give us the smallest and largest measurements.					

Very important: Take note of the following.

- DO NOT deduct ANYTHING from measurements. Leave that to us.
- Are there any lintels / beams protruding out from the braai opening? If yes, by how much?
- Is your braai directly in a corner of the room? If yes, left or right?
- We are manufacturers. We don't do installations. If you need help taking measurements, please call and we will recommend installers in your area. Our inserts do not need special installation. If the measurements were taken correctly, the unit will just slide in.
- Please include at least 1 good quality photo of the braai and immediate surroundings, in order for us to see if there is any reason why a "standard" insert braai would not be the optimum solution.
